WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

- Saw 60 from 50 round bar; face both ends.
- Cheeks: two 6 x 30 x 66 flat bar welded to one end face, centred, 8 apart inside (8 spacer).
- Drill 6.5 through both cheeks together, 12 from their free ends.
- Galvanise. Mass about 1.1 kg with its pin.
- Fit: cheeks over the tang, 6 mm lock pin through the middle tang hole; only with the pole head off.
- Check: the weight swings freely on its pin.
