WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Flat: 6 x 28 flat bar, 60 long. Drill 10.5 at 12 and 2.1 at 50 from the bottom end, on the centre line (the same holes as the ring's tang).

Bar: about 220 of 10 round bar. Bend a J round a 50 pipe in the vice: 30 bend radius to the bar centre, legs 60 apart, tip leg 35 long.

Weld the long leg 10 up the flat's bottom edge, both sides, in line with the flat. Galvanise.

Check: the fork slides over the flat freely and a 2 rod passes cheek, flat and cheek.
