WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut 300 x 120 from 40 closed-cell foam (net float or packaging foam; not polystyrene).

Cut a 30 deep, 60 wide notch in each end.

Round the corners; paint orange.

Tie the cord's free end through a 6 hole near one notch and wind the 10 m lengthwise in the notches.

Floats the ring and cord with 2 times reserve; not the jiggling weight.

Check: floats with the ring hung on it.
