WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Socket: 38 x 3 steel tube, 120 long, ends square.
End plate: 38 disc of 6 plate, welded across one end.
Cheeks: two 6 x 30 x 69 flat bar, welded under the plate, centred, 8 apart inside (use an 8 spacer while welding).
Drill the 2.1 shear pin hole through both cheeks together, 55 below the plate.
Drill 6.5 across the socket 60 above the plate.
Galvanise; paint the pin rating on the socket.
Check: the tang slides between the cheeks freely.
