WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut two 200 lengths; deburr inside and out.
Inside must slide on the 32 pole by hand: if the tube
is 38 x 3, open the bore with emery on a stick.
4.9 hole across, 60 from one end (rivets).
6.5 hole across, 150 from the same end (lock pin).
Fit: rivet end over the top of the section below,
pushed on 100 so the hole meets its 4.9 hole;
one rivet each side.
Check: next section slides in and the 6.5 holes meet.
