WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Flat: 6 x 28 x 50 flat bar; drill 2.1 for the shear pin 10 from the top and 10.5 for the tether 26 below.

Hook: about 150 of 12 bar; bend a J over a 56 mm former, 30 straight below the flat, tip 30 long; throat 44 inside, opening upward.

Weld the shank square under the flat, on its centre line.

Galvanise with the ring. Mass about 0.19 kg.

Fit: in the fork in place of the ring, same shear pin.

Check: swings freely in the fork; a 16 mm rope doubled drops into the throat.
